ROSHNI PRAJAPATI

MERN STACK DEVELOPER

OBJECTIVE

I am seeking an opportunity as a Full Stack Developer where I can apply my knowledge of both front-end and back-end technologies to build responsive and efficient web applications and user-friendly web applications and continue to grow professionally by learning new technologies and improving my technical skills.

EXPERIENCE

NETWORK TROUBLESHOOTER

May 2017 – Feb 2018

Network Monitoring and Troubleshooting: Actively monitored network performance and proactively resolved latency, bandwidth, and connectivity issues.
Problem Resolution: resolve network issues related to configuration problems.

PROJECTS

1. Frontend Web Project: E-Commerce website
Technologies Used: HTML, CSS, Bootstrap
- Designed and developed an eCommerce Jewellery website using Bootstrap. Created responsive layouts for product display, homepage, and contact sections.

2. Backend Web Project: Blog Project
Technologies Used: HTML, CSS, Bootstrap, MongoDB, Node.js, express.js, passport.js,
- Built a blog website using Node.js, Express, and MongoDB.
- Added user login and signup with Passport.js for authentication.
- Users can create, edit, and delete their own blog posts.
  Used EJS for pages and made the site easy to use.

3. ReactJs Project: Add Product Project
Technologies Used: HTML, CSS, Bootstrap, ReactJs
- made a login page using React and Google Sign-In.
- Used Firebase/Google API to let users log in with their Google account.
- Show user profile info after successful login.
